# PERFECTLY BALANCED

**ELITE**<sup>®</sup>  
SERIES

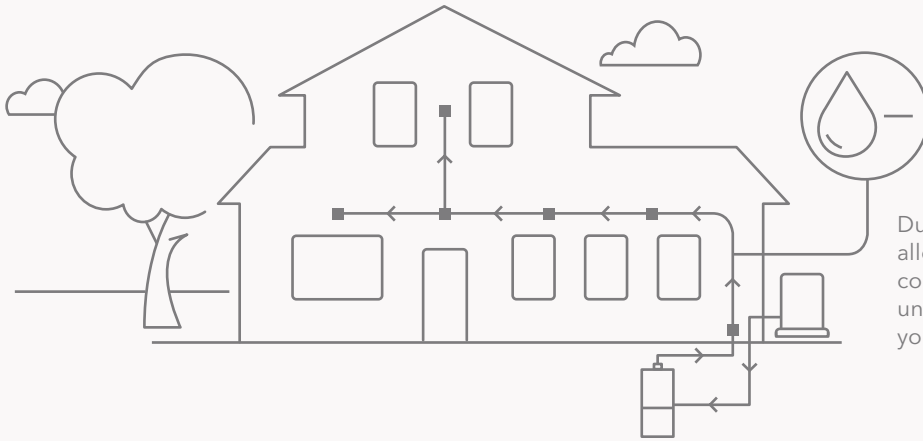

**EL296E** | TWO-STAGE GAS FURNACE  
WITH POWER SAVER™  
TECHNOLOGY

Consistent temperatures, even airflow and quiet operation

# ENHANCED COMFORT

The EL296E has the power to make your home feel comfortable every day of the year. It offers two-stage operation, which allows it to fine-tune performance to match your comfort needs. And, thanks to its Power Saver™ motor, it provides more consistent temperatures, more even airflow and quieter operation, while still using energy efficiently.

During summer months, the EL296E's lower speed allows air to have more contact with the outside coil, the cooling engine of your air-conditioning unit. This helps reduce moisture levels inside your home to enhance your comfort.

# CONSTANT EFFICIENCY

The Power Saver™ constant-torque motor adjusts airspeed based on demand, helping the furnace use less energy in both heating and cooling modes. Its heating efficiency rating of 96% AFUE\* means the EL296E can convert 96% of its fuel into heat you can feel.

**33%**  
MORE EFFICIENT THAN A  
STANDARD MOTOR

The EL296E has earned the ENERGY STAR® certification, which means it meets or exceeds guidelines set forth by the U.S. Environmental Protection Agency.

## EFFICIENCY INNOVATIONS

### TWO-STAGE GAS VALVE

Operates mostly at a lower and more efficient output, switching to a higher output during extreme heating demand.

### POWER SAVER™ MOTOR

Contributes to more even temperatures, more consistent airflow and quieter operation.

### DURALOK PLUS™ HEAT EXCHANGER

Made of patented ArmorTuf™ steel to ensure high reliability and efficiency.

### STAINLESS STEEL SECONDARY HEAT EXCHANGER

Allows the furnace to achieve higher efficiency levels by capturing additional heat.

### SURELIGHT® INTEGRATED FURNACE CONTROL

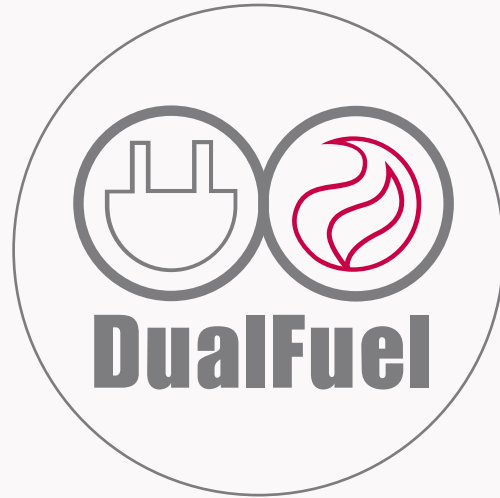

Ensures reliable and efficient operation.

### DUAL-FUEL-CAPABLE

Can be combined with a Lennox® electric heat pump for peak efficiency.

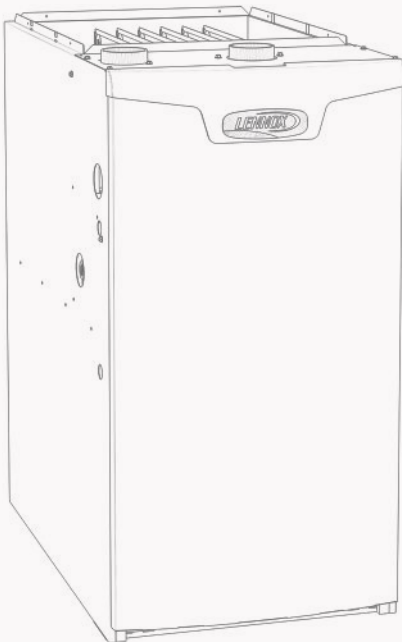

# PERFECTLY PAIRED

When the EL296E is paired with a Lennox® heat pump, it creates a dual-fuel system that can automatically alternate between electricity and gas fuel to keep you warm. So you're always using the most energy-efficient way to keep comfortable.

\*AFUE, or Annual Fuel Utilization Efficiency, is a measure of how much usable heat is generated when natural gas is burned in the furnace. The higher the AFUE, the more heat you'll get from your natural gas, and the less gas you'll have to use to stay warm.

\*\*Covered components may be eligible to receive a 10-year warranty. Online equipment registration at [www.lennoxregistration.com](http://www.lennoxregistration.com) is required within 60 days of installation (except in California and Quebec) or Lennox' base warranty will apply.
