AIRE-FLO

HEATING

95AF

High-Efficiency
Gas Furnace

Affordable comfort with the power to lower your utility bills

The 95AF is the most efficient gas furnace in the Aire-Flo® lineup, with an energy rating of 95% AFUE. That means you receive 95 cents worth of heat from every energy dollar spent! Compared to a standard-efficiency furnace, the 95AF can save you hundreds of dollars each year in utility costs.

Long-lasting performance you can count on

When temperatures drop outside, you want a furnace that you know will provide consistent, reliable warmth. The 95AF delivers, with robust components that are built to last. The aluminized-steel heat exchanger—the part of the furnace that moves heat produced by the furnace into your home—allows maximum heat output with minimum resistance to airflow with a unique weld-free crimp design. The dependable hot-surface ignition, supported by self-diagnostic controls, provides dependable, efficient heat when you need it most.
