

Spring Checklist For Your A/C

Clean The Area Around Your HVAC Unit

DIRT, DUST AND DEBRIS CAN BUILD UP AROUND YOUR HVAC UNIT DURING THE COLDER MONTHS, MAKING SPRING THE PERFECT TIME TO CLEAN UP WHAT HAS ACCUMULATED AROUND YOUR HVAC UNIT.

Replace Your Air Filters

AIR FILTERS SHOULD BE CHECKED ONCE A MONTH. IF YOU HAVE NOT CHECKED YOUR AIR FILTER DURING THE WINTER SEASON, SPRING IS A GREAT TIME TO CLEAN AND/OR REPLACE YOUR FILTER. A WELL MAINTAINED AIR FILTER WILL TRAP DUST, POLLEN AND OTHER ALLERGENS AROUND YOUR HOME.

Test Your HVAC System

AFTER A LONG PERIOD OF INACTIVITY, TESTING YOUR HVAC UNIT ONCE IT'S SPRING CAN ENSURE THAT EVERYTHING IS IN CORRECT WORKING ORDER BEFORE THE WARMER WEATHER HITS. TEST YOUR SYSTEM FOR A MINIMUM OF 1 HOUR, CHECKING IN AND AROUND YOUR UNIT TO SEE IF ANY ISSUES ARISE. IF YOU DO NOTICE SOMETHING UNUSUAL, IT IS BEST TO CONTACT A TRUSTED HVAC EXPERT IN YOUR AREA.

Check Your Air Ducts

CLOGGED AIR DUCTS CAN DECREASE THE EFFICIENCY OF YOUR HVAC UNIT. BE SURE TO CHECK FOR ANY CRACKS OR LEAKY JOINTS IN THE DUCTWORK. IF YOU DO NOTICE THAT REPAIRS ARE REQUIRED, CONTACT YOUR TRUSTED HVAC PROFESSIONAL.

Review The Settings On Your Programmable Thermostat

SPRING IS A GOOD TIME TO REVIEW THE SETTINGS ON YOUR PROGRAMMABLE THERMOSTAT SO THAT YOUR HOME TEMPERATURE STAYS AS COMFORTABLE AS POSSIBLE. IF YOU DO NOT HAVE A PROGRAMMABLE THERMOSTAT, SPRING IS A GREAT TIME TO INSTALL ONE AS THEY CAN MONITOR THE TEMPERATURE OF YOUR HOME AUTOMATICALLY AND CAN HELP KEEP YOUR HVAC UNIT RUNNING EFFICIENTLY.
