

Ductless Air Conditioning Facts

Energy Efficient

Ductless Air Conditioners are energy efficient! Since they are responsible for cooling only one room, it runs less than a central air conditioner, thus making it more energy efficient.

Quiet

Ductless Air Conditioners are much quieter than regular AC units. Their quietness makes them a great option to have installed in bedrooms where you need a quiet system to cool you down.

Customizable

Ductless Air Conditioners are available in a range of power capabilities. This means that they can be customized to suit all of your cooling needs, as well as fit into any reasonable space.

Easy Installation

Installing a Ductless Air Conditioner is an easier process than installing a traditional duct system. They are flexible, and can be easily mounted on ceilings, floors, or walls!

Keeps Air Clean

Not only do Ductless Air Conditioners provide you with cool air, but they also have a filtration system that can remove pollen, dust, mold, pet dander, and others.
